

Database migration assessment report

Source database: DboWMSGrf.dbo.SQL Server - localhost:1433

Version: Microsoft SQL Server 2025 (RTM) - 17.0.1000.7 (X64) Oct 21 2025 12:05:57

Copyright (C) 2025 Microsoft Corporation

Standard Developer Edition (64-bit) on Windows 10 Pro 10.0 <X64> (Build 22621:) (Hypervisor)

Case sensitivity: OFF

Executive summary

Warning!

We found that your source database may be configured not in correct way or you have not enough privileges for reading all necessary metadata. Please check your configuration and run report again. For more details please review [help documentation](#).

List of Action Items to review:

1. [Issue 9997](#) : Unable to resolve objects (number of occurrences: 6)

Recommended action: Verify if the unresolved object is present in the database. If it isn't, check the object name or add the object. If the object is present, transform the code manually.

We completed the analysis of your Microsoft SQL Server source database and estimate that 100% of the database storage objects and 75% of database code objects can be converted automatically or with minimal changes if you select Amazon RDS for PostgreSQL as your migration target.

Database storage objects include schemas, tables, table constraints, indexes, types, table types, sequences, synonyms and xml schema collections.

Database code objects include triggers, views, procedures, scalar functions, inline functions, table-valued functions and database triggers.

Based on the source code syntax analysis, we estimate 99.9% (based on # lines of code) of your code can be converted to Amazon RDS for PostgreSQL automatically.

To complete the migration, we recommend 69 conversion action(s) ranging from simple tasks to medium-complexity actions to complex conversion actions.

Migration guidance for database objects that could not be converted automatically can be found [here](#)

Database objects with conversion actions for Amazon RDS for PostgreSQL

Of the total 136 database storage object(s) and 8 database code object(s) in the source database, we identified 136 (100%) database storage object(s) and 6 (75%) database code object(s) that can be converted to Amazon RDS for PostgreSQL automatically or with minimal changes.

The object(s) action(s) complexity is a sum of the complexity of the action items associated with the object. Therefore, an object with multiple simple action items could be treated as "object with medium-complexity actions" or even as "object with complex actions."

Detailed recommendations for Amazon RDS for PostgreSQL migrations

If you migrate your Microsoft SQL Server database to Amazon RDS for PostgreSQL, we recommend the following actions.

Storage object actions

Table Changes

Not all tables can be converted automatically. You'll need to address these issues manually.

❗ Issue 7831: Make sure that you install the uuid-osp extension to use the newid() function

Recommended action: Revise your database settings and try again.

DboWMSGrf.dbo: Conversion details

Source database: DboWMSGrf.dbo.SQL Server - localhost:1433
Version: Microsoft SQL Server 2025 (RTM) - 17.0.1000.7 (X64) Oct 21 2025 12:05:57
Copyright (C) 2025 Microsoft Corporation
Standard Developer Edition (64-bit) on Windows 10 Pro 10.0 <X64> (Build 22621:) (Hypervisor)
Case sensitivity: OFF

Issue code: 7831 | Number of occurrences: 1 | Estimated complexity: Simple
Databases.DboWMSGrf.Schemas.dbo.Tables.tblLevelColumnDetails.Columns.CellGuid: Line 1:1

Code object actions

View Changes

Not all views can be converted automatically. You'll need to address these issues manually.

Issue 7795: In PostgreSQL, string operations are case sensitive

Recommended action: Review the converted code to make sure that it compares strings correctly.

Issue code: 7795 | Number of occurrences: 24 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Views.PalletDispatchDateWise: Line 13:378
Databases.DboWMSGrf.Schemas.dbo.Views.PalletDispatchDateWise: Line 13:464
Databases.DboWMSGrf.Schemas.dbo.Views.PalletDispatchDateWise: Line 21:741
Databases.DboWMSGrf.Schemas.dbo.Views.PalletDispatchDateWise: Line 21:834
Databases.DboWMSGrf.Schemas.dbo.Views.PalletDispatchDateWise: Line 30:1117
+19 more

Procedure Changes

Not all procedures can be converted automatically. You'll need to address these issues manually.

Issue 7674: DMS SC can't convert unknown clauses

Recommended action: Convert your source code manually.

Issue code: 7674 | Number of occurrences: 2 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 10:218
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 9:219

Issue 7795: In PostgreSQL, string operations are case sensitive

Recommended action: Review the converted code to make sure that it compares strings correctly.

Issue code: 7795 | Number of occurrences: 10 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_BlockUnblockColumn: Line 19:629
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_BlockUnblockColumn: Line 45:1388
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 29:888
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 30:945
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 45:1528
+5 more

Issue 7801: Make sure that your table isn't locked by an open cursor

Recommended action: Review the converted code and change it where necessary.

Source database: DboWMSGrf.dbo.SQL Server - localhost:1433
Version: Microsoft SQL Server 2025 (RTM) - 17.0.1000.7 (X64) Oct 21 2025 12:05:57
Copyright (C) 2025 Microsoft Corporation
Standard Developer Edition (64-bit) on Windows 10 Pro 10.0 <X64> (Build 22621:) (Hypervisor)
Case sensitivity: OFF

Issue code: 7801 | Number of occurrences: 12 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 13:369
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 19:625
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 33:1075
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 80:2666
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 81:2692
+7 more

! Issue 7812: Make sure that you remove the temporary table before the end of the function

Recommended action: Review the converted code and change it where necessary.

Issue code: 7812 | Number of occurrences: 6 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 15:475
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 26:779
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 41:1400
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 14:476
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 25:780
+1 more

! Issue 7823: PostgreSQL doesn't support table hints in DML statements

Recommended action: Revise your code to use PostgreSQL methods for performance tuning.

Issue code: 7823 | Number of occurrences: 6 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 27:813
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 44:1502
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 70:2359
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 26:814
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 43:1503
+1 more

! Issue 7831: Make sure that you install the uuid-osp extension to use the newid() function

Recommended action: Revise your database settings and try again.

Issue code: 7831 | Number of occurrences: 2 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 54:1817
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 53:1818

! Issue 9997: Unable to resolve objects

Recommended action: Verify if the unresolved object is present in the database. If it isn't, check the object name or add the object. If the object is present, transform the code manually.

Issue code: 9997 | Number of occurrences: 6 | Estimated complexity: Simple

Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 13:380
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 19:636
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetails: Line 33:1086
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 12:381
Databases.DboWMSGrf.Schemas.dbo.Procedures.sp_GetLevelCellDetailsNew: Line 18:637
